In spite of high inflation, with the CPI at 11.2% and WPI at 7.52%, RBI, in its mid-quarter monetary policy on December 18, 2013, chose to keep policy rates unchanged. This stance of RBI, much against the consensus expectation of a 25bps hike in the repo rate, was guided by RBI's expectation that inflation would ease in the near future. An expected fall in inflation in the coming months will drive a shift in debate to a rate cut sometime in the 2nd half of CY14.

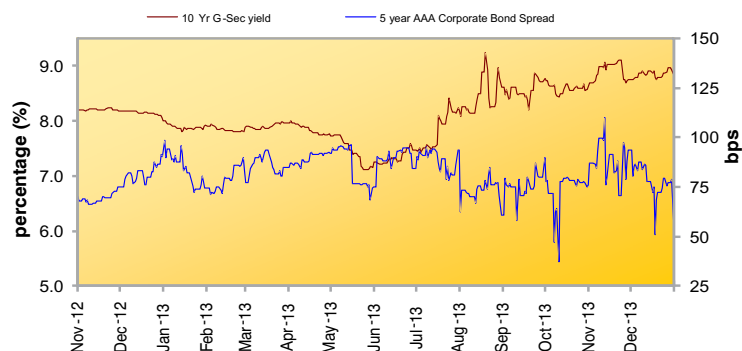

On the external front, the US Fed's decision to begin tapering by \$10bn was well weathered by global equity markets. Indian equity markets too were resilient. Improving growth prospects in the developed world will aid Indian exports in 2014. Imports will remain muted due to the domestic slowdown and lower commodity prices.

CY2014 looks to be a year of two distinct halves, the first till the general elections and the second post the general elections. Politics and US Federal Reserve tapering will be the headlines in the first half, with the subtexts being inflation, interest rates and corporate earnings. In the short to medium term, asset markets will be driven by monthly inflation data, any RBI action on the rate front, political developments, policy reforms and tapering tantrums.

Post elections, fiscal deficit funding and the economic recovery and its resultant impact on earnings will be key headlines.

Outlook for equities

Indian equities saw a relatively volatile December with index returns of 9% for CY2013. The front line indices proceeded to make fresh all-time highs as market sentiment was buoyed by the outcome of the State Elections. Foreign Institutional Investors (FIIs) ended December 2013 as net buyers, with net inflows of \$2.5bn, taking their total inflows for CY13 to \$20bn. This is the third biggest year for FII inflows. Domestic Institutional Investors (DIIs) remained net sellers, notching up \$1.2bn net outflows in December 2013, taking their total outflows for CY13 to \$12.9bn.

For FY15, we expect the BSE Sensex EPS at 1500, an earnings growth of 12%. Based on fundamental valuations of 15.5-16x FY15e EPS, the full year BSE Sensex target would be 23300-24000.

Outlook for debt

Bond markets were range bound in the absence of any triggers. Liquidity is within RBI's comfort zone of +/- 1% of NDTL. Bond spreads remained tight due to a lack of supply at the longer end of the curve. This was also due to a large amount of tax free bonds issued by PSU's. We expect the 10 year government bond to trade in the range of 8.75% to 8.90% in the near term. Corporate bonds spreads are expected to remain at 60bps for some more time.
